Harbortouch customers: Could your business run more efficiently in the back office?

Harbortouch has partnered with Sarbari to deliver their cloud-based purchasing software to our customers, and help you streamline the entire purchasing process in the back office. As a result of increasing efficiency, Sarbari users see savings in both time and money every month.

How does the purchasing software from Sarbari work?

ORGANIZE: The Sarbari team (with your input) builds a product list customized for your business, including all of the items you regularly buy (and some items you may want to buy) from all of the suppliers you currently use.

STREAMLINE: When the time comes (i.e., daily, weekly, bi-weekly, monthly) you will simply review your customized product list, choose the items and quantities you need, and place one order that is sent to all of your suppliers at one time via email. The ordering process now takes 15-20 minutes, instead of an hour (or two) that it takes you today.

SAVE: Sarbari users save both time and money every month. No more clipboards, no more late night calls to place orders, no more leaving voicemail messages and hoping your order comes in correctly.

Some Sarbari clients include:

THE ALLWOOD DINER — Billy's DOWNTOWN DINER — BOSTON HARBOR HOTEL *Beyond compare.* — DINER 248 — EL PELON TAQUERIA — char steakhouse

STATE LINE Diner RESTAURANT — tired hands BREWING COMPANY — russell's STEAKS · CHOPS · & MORE — TWO RIVERS BREWING COMPANY — GOTHAM CITY DINER — toast BREAKFAST . BRUNCH . LUNCH
