

Sling is a scheduling and communication software for companies where employees work on shifts. Sling is built around four features: shifts, tasks, messages and newsfeed, it allows managers to organize all aspects of their work on a single platform.

Scheduling

No matter the size of your business, Sling helps you organize your employees' work schedules. We make employee scheduling easy so you can get it done quickly and move on to other tasks.

Tasks

Assign tasks and follow their progress. Create to-do lists for yourself or your employees. Set due dates and get reminded as the dates approach.

Messaging

Send messages to groups or individuals. Easily reach employees within groups, locations or specific positions. Share anything you like, files, photos, videos or links.

Newsfeed

Set up pages on your newsfeed for any purpose you like. Share updates, files, pictures and videos. Create your own social space – interact... have fun.

Premium Features

Time clock

Easily track employee hours and reduce human error and time theft.

Shift templates

Build schedules faster by loading common schedules from saved templates.

Labor cost

Keep labor costs in check and avoid exceeding your budget or scheduling overtime.

Google Calendar sync

Connect your work schedule to your personal calendar to see all of your commitments at a glance.

Reports

Uncover insightful labor patterns and empower managers with data.
